Exercise

Objective

Refactor the `getBookSummary` function to use modern ES6+ syntax. You must use an arrow function, `const`, object destructuring, and a template literal.

ES6 features to use:
- Arrow function
- Destructuring
- Template Literals

Initial Code

```html
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Document</title>
</head>

<body>

<script>
    const book = {
        title: 'The Hobbit',
        author: 'J.R.R. Tolkien',
        year: 1937
    };

    function getBookSummary(bookObject) {
        const summary = "The book '" + bookObject.title + "' was written by " + bookObject.author + ".";
        return summary;
    }
```

```
const getBookSummary = (bookObject) => {
        const summary = `The book  ${title} was written by ${author}.`;
        return summary;
}

   console.log(getBookSummary(book));
</script>

</body>

</html>
```
